Julio's presentasjon

Comes from a state in the middle of Mexico. His city is the centre for tourism in the region. Many waterfalls and cenotes (synkehull)

He thinks he is a nice guy. Likes to talk a lot. His classmates like to practice English and also some like to talk Spanish so Julio has not learned too much Norwegian yet.. He is already getting homework from school. Been here 2 weeks and everything is great. Nice to go to school by car because then he can watch the view of the sea.

Aim to get closer to his Norwegian family and participate in their different activities. Ordered from family at home: to try everything! Didn't, by the way, like the brown cheese. Enjoys walks outside, Have climbed Gaustadtoppen and already experienced some snow.

School is kind of tough because of the language.

Missing the family back in Mexico

Thanks to everybody here for the opportunity he has gotten as a "once in a lifetime". Only 16 years old. Plans to return to Mexico with a lot of other and new ideas.

Present observations of Norway being different from Mexico: Garbage sorting. Better organization.

Expect to be more independent and make better decisions. Still going to live one year with his parents when he returns.

Two options: dentist or doctor. Father is a dentist

Climate very different . Home approx 45. used to 35-45.

Norske oppfinnelser og patenter

Egildius Elling: 1903 den første i verden som fikk en gassturbin til å virke med positiv virkningsgrad. Jetmotoren er det en annen som har fått æren for å ha oppfunnet

Referent: HG
